PROFESSIONAL PROFILE

Entry-to-Intermediate · Actively Growing

Full-stack developer building real, deployed applications while pursuing a BS in Computer Science. I write clean code across Python/Django backends and JavaScript/React frontends. Currently expanding into React and advanced Django. Open to internships and junior roles.

EXPERIENCE

Software Development Intern

Software House · 6 Months · Remote

- Implemented OpenCV-based color detection and object tracking algorithms.
- Shipped features on live production projects alongside senior developers.
- Deepened Python proficiency and professional development practices.

Operations & Analytics Lead

London Go Cabs Provider · 1 Year · Karachi

- Managed sales operations with metrics tracking and performance monitoring.
- Achieved consistent revenue targets and improved operational efficiency.

Business Developer

Apptify Solution · 1 Year · Remote

- Managed and optimized Upwork profiles to maintain a professional presence and attract relevant opportunities.
- Handled Upwork bidding by identifying suitable projects and submitting tailored proposals.
- Managed client communication, project inquiries, and initial requirements to support business development.
- Researched freelance opportunities and contributed to lead generation and client acquisition.

PROJECTS

Real-time Chat Application

Messaging platform with WebSocket + Redis delivery, SQLite persistence, live user presence, and responsive frontend.

Python

Django

WebSocket

Redis

SQLite

JavaScript

E-Commerce Cart Application

Shopping cart with add/remove, quantity controls, price calculation, and LocalStorage persistence.

HTML

CSS

JavaScript

LocalStorage

Demo Skin Product App

React skincare showcase with product listings, pricing, and responsive mobile-first layout.

React

CSS

Responsive Design

Netflix Homepage Clone

Pixel-accurate Netflix landing page with flexbox, positioning, and responsive breakpoints.

HTML

CSS

To-Do List Application

Task manager with add, delete, and mark-complete — vanilla JS, zero dependencies.

HTML

CSS

JavaScript

MINDSET & GROWTH

- Self-taught full-stack developer through deliberate, shipped projects
- Clean, maintainable code is non-negotiable — not optional
- Actively studying system design, scalable architecture, and modern frameworks
- Passionate about building products that actually work in the real world
